## ACRYLIC & GLASS

Our thick, resilient **ACRYLIC** table tops feature an attractive "hammered" textured pattern and are available on many Troptione® tables. They are weather and shatter resistant, making them as tough as they are stylish. When ease of maintenance, durability and safety are of concern, Acrylic tops are the ideal solution.

Our **OBSCURE GLASS** table tops are 3/16" thick and are tempered for strength and safety. The tops feature an attractive "hammered" texture which helps minimize finger prints and hide unsightly dirt.

Icons represent the type of tops available for a specific table base. Top model #/U indicates umbrella hole is available.

## STONEWORKS®

Designed to mimic Italian quarried stone, these **FAUX GRANITE** table tops offer a regal appearance with easy maintenance. Weather-resistant and durable, these tops feature a chiseled edge and hand-applied patinas protected by strong sealants.

**MATRIX** table tops are made of glass-fiber reinforced polymer designed to provide a similar appearance to concrete and terrazzo. The tops are commercial-grade quality, designed to resist fading and cracking.

# BAR STOOL ORDERING (25" TO 30" HEIGHT ONLY)

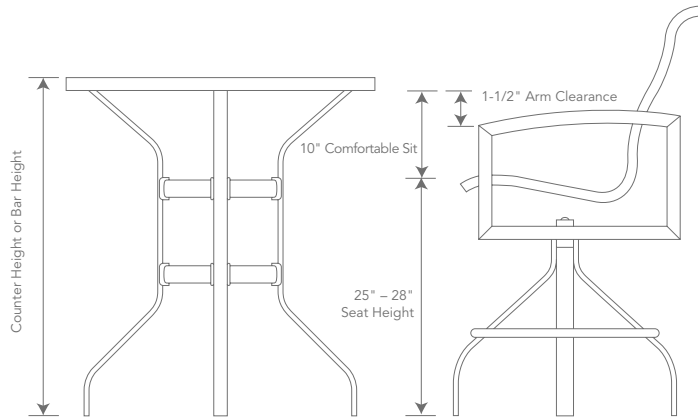

**DETERMINING BAR STOOL HEIGHT** This information is for only those bar stools that can be ordered in various heights.

Tropitone® Bar Height Tables accommodate 28" bar stools. Tropitone® Counter Height Tables accommodate 25" bar stools. Custom bars and counters may require a custom seat height for optimum comfort. To determine required seat height, subtract 10" from the bottom of the counter. This will be desired seat height. Note: Allow for a minimum of 1.5" for arm clearance.

**Bar/Counter Height:** The distance from the top of the table surface to the ground.

**Seat Height:** The distance from the highest point of the seat to the ground. The most comfortable seat height for most body types is at least 10" from the seat to the underside of the table.

**Arm Clearance:** The distance from the highest point of the arm to the bottom of the table surface. A minimum arm clearance of 1.5" is suggested for all bar stools. Clearance of less than 1.5" is not recommended.

## CUSTOM SEAT HEIGHTS

To specify a custom seat height, measure from the floor to the bottom of your counter surface and subtract 10 inches. To order, use the grid to select the model number and add the appropriate seat height. For example, a Corsica Sling Bar Stool with a 27" seat height is model #161127-27. Note: Tropitone® Bar Stool seat heights have a tolerance +/- 1/2".

The following seat heights are available at standard bar stool pricing: 25", 28" and 30". The following seat heights are available at an upcharge: 26", 27" and 29". Contact your Tropitone® Sales Representative for details.
